

Be part of the solution to managing spray drift

McGregor Gourlay in conjunction with Nufarm invite you to join us at our Managing Spray Drift Workshop.

This workshop will provide the knowledge to successfully manage drift by covering basic, practical and technical aspects of spray application.

Topics will include:

- 2,4-D label update.
- Mixing demonstration - 2,4-D and Crucial, AMS, Activator.
- Compatibility demonstration. What not to do !
- Application/decontamination.
- Nozzle/boom height demonstration—nozzle selection for the job at hand.
- Demonstration of Activator vs BS1000.

When: Thursday, 3rd June 2021

Time: 10.00am, BBQ lunch & drinks provided after the demonstration.

Where: Woodburn SES, 3 Uralba Street, Woodburn NSW2472

RSVP: Monday, 24th May 2021, T 02 6629 2100 or email lismore@mgregorgourlay.com.au

COVID19 - Please note that we will have in place safe COVID19 safety practices during your time with us including hand sanitiser, a smile instead of a handshake and social distancing.

Should you have cold or flu symptoms, a cough, raised temperature or just feel unwell we ask you to please stay home but we will gladly give you the discussion notes at a later date.
